# INSTALLATION INSTRUCTION VANDAL PROOF KIT

## INSTALLATION

1. Remove snap-in strainer from unit and replace existing drain plug with vandal proof drain plug. Replace strainer and secure with cap screw.

2. Remove projector from unit, if unit is equipped with a plastic projector nipple (see step no. 3), if not replace with vandal proof projector and tighten set screw at bottom of projector.

3. Remove front panel from unit, if necessary, and disconnect water tubing from plastic projector nipple. Replace with brass connection and square projector nipple. Reconnect vandal proof projector and tighten set screw
